

Profile

I am a skilled data analyst with a strong technical background in business intelligence and work history in data analysis. With around 2 years of experience in the field, I developed a solid grasp on business and strategy. Currently, I am eager to put my skills to use and seeking new opportunities to make a significant impact in the field of data analysis.

Professional Experience

Data analyst

Naki Power

Jun 2022 – Dec 2022 | Paris, France

- Streamlined monitoring of KPIs for Operations/Marketing/Sales departments by designing and enhancing dashboards, resulting in significantly increased efficiency.
- Acted as primary point of contact for all data-related topics for 4 departments across 4 countries, including conducting in-depth analysis of business strategy.
- Advised and supported the Investor deck and data room design.
- Revitalized sales workflow by utilizing Google Places API data scraping to identify and prioritize potential leads (over 100,000) through classification and then feeding them through Pipedrive.
- Conducted A/B testing to optimize pricing strategy, leading to improved revenue per rental for services in Sweden by 50%.

Data Quality Specialist

Amazon

Jul 2019 – Dec 2020 | Hyderabad, India

- Conducted case-level analysis to identify predictors and root causes of business issues, leading to development of customer experience and delivery improvements.
- Generated data-driven reports and provided insights to stakeholders, facilitating informed decision-making and problem-solving.
- Analyzed metric issues related to customer delivery experience and identified root causes.
- Proposed viable solutions to improve performance based on analysis.
